

2022

DatE-IT

Data- | Elektro- | Informationstechnik

Welcome to DatE-IT 2022

The time has finally come to meet our future employers! This year's DatE-IT will take place on the 17th of November. I'm excited to see all of you there.

We are happy to announce that this year we will have over 90 excited companies attending the fair. This is a new record! Since the fair is growing, this year's DatE-IT will be in both SB-multisal and Betonghallen. Make sure to visit both so that you don't miss any of the interesting exhibitors. Hopefully every one of you should be able to find a company that interest you.

DatE-IT is for all students studying Computer-, Electrical-, Software- and Biomedical Engineering. Therefore, I encourage you to go out there and talk to the exhibitors, no matter if you're a first or last year student. Be curious, ask questions and don't be afraid. Who knows, you might find the job of your dreams, the perfect master thesis or an interesting summer internship.

Can't wait for the fair to begin? Don't worry, we start already on Monday the 14th of November with speakers week. The 3 weekdays leading up to

the fair are packed with interesting lunch seminars from companies that will attend the fair.

Lastly, I would like to extend my thanks to the DatE-IT crew who have worked really hard for this day. For setting high goals and for accepting the challenges that comes with it.

See you on the 17th of November!

Ulrika Einarsson

About

Sverige. 10,4 miljoner unika individer som bildar en gemenskap, ett samhälle. Vi på Skatteverket bidrar till att göra det samhället möjligt. Vi gör det genom att säkerställa finansieringen av det offentliga. Av vägar och vård, skolor och kollektivtrafik. Vi gör det genom att folkbokföra, som grund för ett väl fungerande samhälle. Vi är 10 000 kollegor över hela landet. Med olika bakgrunder, erfarenheter och kompetenser. Varje dag tänker, testar och lär vi nytt.

Squeed AB

About

We believe that great software is created by people who are happy, confident and have the right tools to develop in their work! Our journey began around 12 years ago with five developers who wanted to create a different workplace - with passion in its center. Since then, we have grown from 5 passionate developers to around 90 and you can find us in Gothenburg, Stockholm and Oslo. We work towards a group of different industries like the automotive industry, retail, aviation, pharmaceutical industries, telecom, finance, healthcare and transport.

About

Chalmers Rekrytering is Chalmers student union's own recruiting company. We strive to help Chalmers' students to establish themselves in the work market. Since our start in 2008, we have helped many students to take the next leap in their careers - and many companies to find the right student. We have done this well, that we are today Sweden's biggest student driven recruitment company.

About

CTK is a company within Chalmers Student union where students work with consulting at the side of full-time studies. This is to start your career as an engineer before your exam, to manage your own business and lower the gap between the studies of Chalmers and the corporate world.

**CHALMERS.
STUDENTKÅR
PROMOTION**

About

Chalmers Studentkår Promotion (CSP) is one of Chalmers Student Union's student-run companies and focuses on marketing external companies to students on Campus. At CSP the events are both planned and marketed by students, the CEO-pair are students and half of our board members are students. Our goal is to be an attractive meeting place between student union members and businesses. We work actively to create sustainable relationships between these stakeholders and thus CSP becomes a bridge into business life for student union members and a good way to connect with motivated students and companies. To achieve our goals, we organize theme weeks, fairs, and events, and spread relevant marketing to Chalmerists.

CHALMERS ENTREPRENEURSHIP VILLAGE

About

Chalmers Entrepreneurship Village is a part of Chalmers' world leading ecosystem for entrepreneurial careers. The village and its community is filled with opportunities for students, researchers, creators, startups and organisations who are interested in sustainable entrepreneurship and innovation. The village is also the home for over 60 startups, organisations and other actors who contribute to the community through activities, knowledge and support for those interested in pursuing an entrepreneurial career in different ways. Welcome join us to co-create the future!

Contact

Madeleine Wahlberg
madeleine.wahlberg@chalmers.se
www.chalmersevillage.se

You can find the contact informations and read more about the startups and organisations here:
www.chalmersevillage.se/fairs

Vesiro's new innovative technology enables higher query speeds in large databases. By reducing query times they help companies save time and costs as well as reduce the energy waste from their servers.
www.vesiro.com

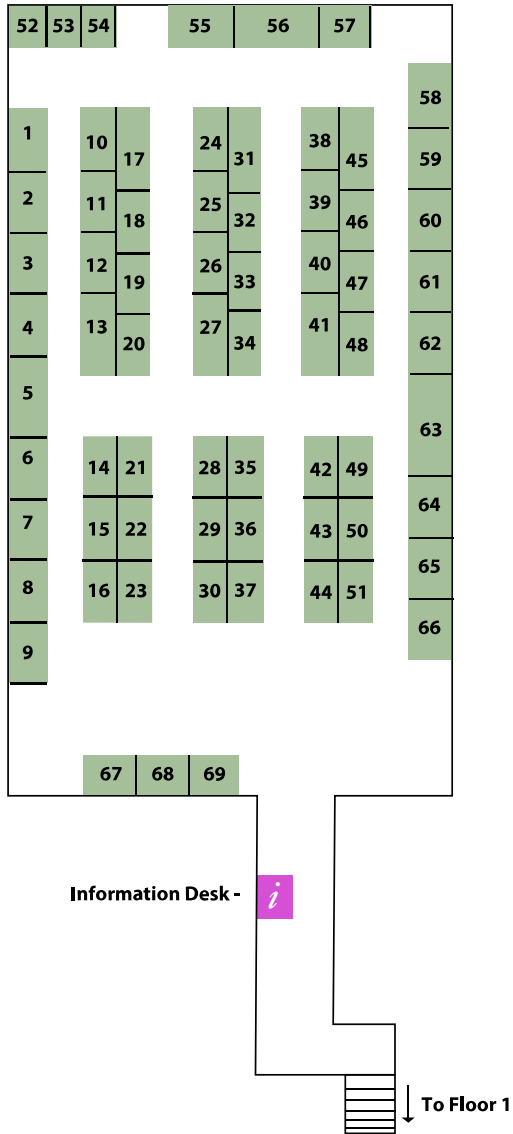

There are many ways that hackers can exploit a system. The consequences can be severe seeing to both cost and leakage or disruption of sensitive information. Elvira by norgald identifies vulnerabilities in IT and OT components, mitigates the risk and proposes a solution to the problem.
www.norgald.com

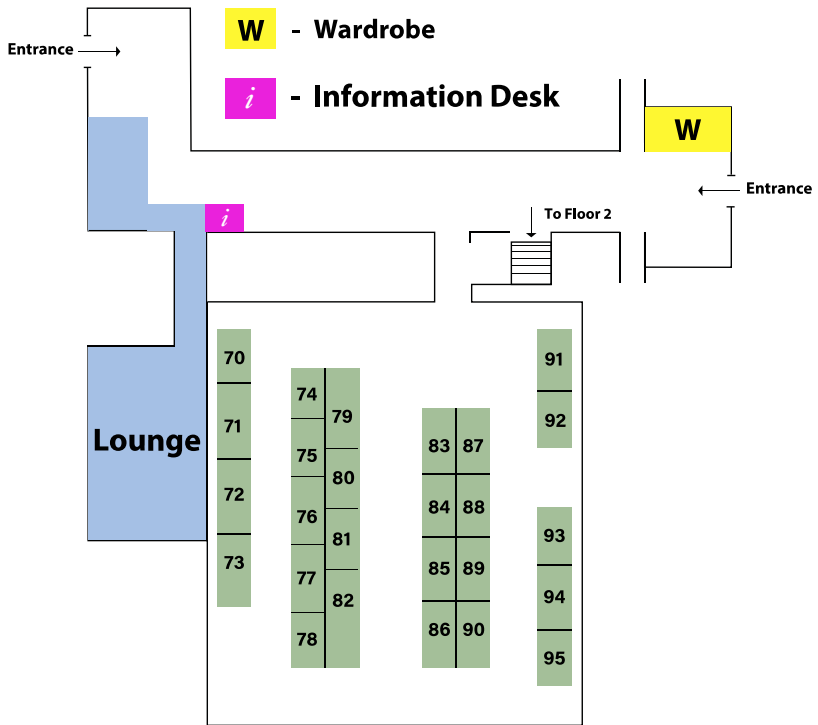

Ignite Sweden have a mission; to make it easier for the Swedish startups to find their first large customer so they can grow their business. There is always a startup out there that can help the private and public sectors innovate and solve their numerous challenges. But they cannot always find each other.
